PULSE AWARDS

The BroadwayWorld Fort Wayne awards were announced and the Pulse made the list.

The Boxcar Children was recognized for as the Best Theatre for Young Audiences Production and two of its cast members won as well. Vivian Littell won for Best Performer in a Play and Jamison Dickey won for Best Supporting Performer in a Play. Congratulations to Vivian and Jamison!!!

I also won Best Direction of a Play for Letters Home. So pleased and honored to see Letters Home recognized. This was a project very near and dear to my heart. This recognition is not just about me as this was a group project. I learned so much from all of those in the cast as well as those researching and honoring our soldiers. This warms my heart.

Ralph Tuttle's production for Joseph and the Amazing Technicolor Dreamcoat for Wells Community Theatre did well, too. Congratulations for winning Best Musical, Best Dance Production, Best Ensemble and Best Sound Design! Well deserved.

Treva's
Recipe Box
by Treva Flemming

Last week I noted I was making oven fried chicken in my article for Sunday supper. I was really impressed with this recipe for being baked. It cooked up nice and brown and looked really nice, unlike when I pan fry chicken I always seem to get side tracked and tend to burn the breading on it. So I will share with you this recipe and hope you like it too.

THE BEST OVEN FRIED CHICKEN

2 eggs	2 tsp paprika
1 c. panko bread crumbs	1/2 tsp pepper
3/4 c. flour	2 lbs boneless skinless chicken breast
1 tbsp season salt	1/4 c. butter

Preheat oven to 425 degrees. In a shallow dish whisk the eggs. In a second shallow bowl, combine the bread crumbs, flour, seasoning salt, paprika and pepper.

Coat each piece of chicken in the egg, then in the breading mixture, press firmly to adhere. Place the chicken on a plate and repeat until all the chicken is coated

To a rimmed baking sheet, add the butter and put the pan in the oven to melt the butter. You want the pan to be hot but do not burn the butter. Place the chicken on the hot pan, leaving a good amount of space between each piece of meat. Bake 20 minutes, flipping gently halfway through or until cooked through and a meat thermometer reaches at least 165 degrees. Remove from pan and serve immediately.

SOCIAL SECURITY MATTERS

by Russell Gloor, National Social Security Advisor at the AMAC Foundation, the non-profit arm of the Association of Mature American Citizens

Ask Rusty - My Wife Believes She Can Get a Spouse Benefit While I'm Still Alive; Can She?

Dear Rusty: A friend of my wife told her, and she believes, she could receive a Social Security benefit

based on my SS benefit that I'm currently receiving while I'm still alive. I told her she could only receive spouse survivor benefits. Is there any truth to what she now believes? Would you settle this issue for us please? Thank you. Signed: Uncertain Husband

Dear Uncertain Husband: Well, surely don't want to get in the middle of your martial discussion, but I'll be happy to explain Social Security's rules about your wife's eligibility for spousal benefits while you are both still living. And just for awareness for both of you, the rules about spousal benefits are one of the most confusing areas of Social Security.

Per Social Security's rules, a spouse (e.g., your wife) can receive a "spousal boost" from you – while you are still living – if the SS retirement benefit she is personally entitled to at her full retirement age (FRA) is less than 50% of the SS retirement benefit you are (were) entitled to at your FRA (full retirement age amounts are used to calculate living spouse benefits, regardless of when each of you actually claimed your Social Security).

So, if your FRA entitlement benefit amount is more than twice your wife's FRA

entitlement benefit amount, she can, indeed, get a "spousal boost" from your record while you are both still living. The spousal boost is added to her own SS retirement amount and will be based on the difference between her FRA entitlement and half of your FRA entitlement. Thus, in this discussion, your wife may be correct - she may be able to get a spousal boost from you while both of you are living, depending on how your personal FRA retirement amounts compare. The best way for your wife to find out is to contact Social Security on 1.800.772.1213 to inquire, and if she's eligible, also make an appointment to apply for her spousal benefit.

And to clarify your wife's options as your possible widow, a surviving spouse can also get a survivor

benefit if their marital partner passes away, but only if the deceased spouse's current benefit (at death) was more than the surviving spouse is already receiving. The surviving spouse receives the higher amount, instead of their own smaller Social Security retirement benefit.

But here is an important thing to know: Whenever any Social Security benefit (including a spousal or surviving spouse benefit) is claimed before the recipient's full retirement age, the payment amount is permanently reduced (both spousal and survivor benefits do not reach maximum until the recipient's full retirement age). And just to complete the picture for survivor benefits, a surviving spouse is also entitled to a one-time, lump-sum death benefit of \$255 if their marital partner dies, in addition to any other benefit they are entitled to.

TAKE EXTRA MEASURES TO HELP PREVENT CHECK FRAUD

(StatePoint) The use of checks may be declining, but check crimes are actually on the rise due to new, creative criminal schemes. Once a check is stolen, it can be altered or signed on your behalf to withdraw money from your account, and there are online marketplaces where criminals will sell stolen checks for other criminals to use for fraud.

Luckily, there are steps you can take to protect yourself:

- Pay Digitally. Reduce the number of checks you send and utilize card or digital payment methods instead. Consider using check fraud prevention services like Positive Pay, if available at your financial institution.

- Go to the Post Office. If you must mail a check, use the secure mailbox inside a USPS facility or hand the envelope over to a postal worker who can mail it for you.

- Follow Up. If you mail a check, confirm with the payee that they received it.

- Monitor Accounts. Set up account alerts and review statements regularly. Most banks will provide an option for an image of each check to be viewable on statements. Cross-reference this image to ensure that the check processed is identical to the one you wrote.

- Report Quickly. Approximately 50% of stolen check images are posted online for sale within eight days of theft. Criminals act fast, and you need to act fast, too, to stop them in their tracks. As soon as you identify an account or payment

anomaly, notify your bank to put a stop payment on the check and a freeze on your account. File a police report and submit a separate report with the Federal Trade Commission. Keep a record of all conversations, reports and correspondence in case later problems arise.

Methods of fraud continue to evolve, and a simple check can be used in a variety of ways to commit theft. For instance, criminals can create fraudulent checks using your account information and sign your name. Or they could copy down your account information and use it for fraudulent purposes digitally or otherwise. Mail theft-related check fraud – where a check is stolen while enroute – accounts for hundreds of millions of dollars in attempted theft annually.

Here are some of the most common fraud methods used:

Account Theft. Checks are used to steal account information details to either steal money directly or fraudulently open additional accounts.

Forgery. Criminals have long forged the legitimate signature or altered the payee or amount on a check. However, artificial intelligence (AI) is making it easier than ever to do so with accuracy.

Check Washing. Criminals “wash” a check, using chemicals like acetone or bleach to erase the payee and amount, then rewrite the check to themselves for their amount of choice.

Counterfeits. Criminals create entirely fake checks that look real using stolen account information.

Check Return Schemes. Criminals will send what they claim is a paycheck or other payment by way of a check where they “overpay.” They ask you to deposit it, then return the “extra” money back before it’s discovered that the check is fake.

For more fraud prevention information, visit PNC’s Security and Privacy Center.

Safe handling of checks may not only protect against theft but also defend against more widespread account compromise.

KEEP YOUR HOME WARM AND SAFE DURING COLD FRONTS

(StatePoint) Cold fronts come on fierce and fast. And when they do, having a trusted space heater can keep your living spaces cozy and comfortable, and your energy bills in check. Survive and thrive this winter’s polar vortexes, Arctic blasts, cold fronts and blizzards with these electric heater tips:

Prioritize safety: A high-quality space heater will not only deliver reliable, long-lasting performance, it will also be engineered with your well-being in mind. If you’ve ever hesitated to bring a space heater into your home, keep in mind that many of the latest models have been specially engineered to prioritize safety. Every heater from Lasko, the number one heater brand in the United States, feature smart safeguards, such as overheat protection, tip-over safety switches, and cool touch housing, for ultimate peace of mind. They’re also available at major retailers and online, so

you can also find them on demand before the temperatures plunge.

Choose the right model for your needs: Finding the right model for your needs is important. For example, if portability is a priority because you intend to use one space heater in different rooms, consider the Lasko 22" Ceramic Tower Heater (CT22495), available at Home Depot, which has an easy-grip handle and a 6-foot power cord for flexibility, plus optional oscillation for full room coverage. Its child lock, along with its safety rollover design, make it a good option for those with little ones.

To warm up larger living spaces, opt for a model that utilizes widespread oscillation to ensure consistent and comfortable heat distribution throughout the room, such as the Lasko 22" Oscillating Ceramic Tower Space Heater (CT22850), available at Walmart. With four comfort settings, and an adjustable thermostat, it’s well-suited for anyone seeking personalized temperature control.

Eco-friendly and cost-effective, both models offer Auto Eco Mode, which will maintain the selected room temperature by automatically adjusting heat output to deliver consistent comfort while reducing energy use.

Position electric heaters properly: Keep electric heaters away from areas

where they can be harmed by water or dampness, or, use heaters specially designed for rooms like bathrooms and laundry rooms, which feature safeguards for moist spaces. You should also place typical space heaters a foot or two from the wall. For tighter spaces, consider a model with intake and exhaust vents on the front of the unit so it can be placed at the wall. No matter what, position your electric heater away from flammable materials, and establish a three-foot buffer zone between the heater and foot traffic.

As you face cold fronts this winter, don’t settle for anything less than ultimate comfort. A great space heater is ideal for warming up your home safely and reliably.
