The Pie contest will have three categories – fruit, cream and miscellaneous. Each participant is allowed only two entries and there is a \$1 charge per entry. Pie fillings, frostings, glazes and meringues, cooked or uncooked, may not contain cream cheese, whipped cream, unpasteurized milk or egg whites. Eggs that are cooked to 160 degrees may be used. #### THE 200-YEAR HISTORY OF DAYLIGHT SAVING INCLUDES STOPS, TURNS, AND REVERSES

There's one good thing to be said for the end of daylight-saying time: You get an extra hour of sleep on October 28. That makes it more pleasant than its beginning date when you had to get up an hour earlier. People have grappled with the situation for a long, long time.

Though it took about 150 years to catch on, Benjamin Franklin is the first known American to suggest saving daylight back in 1784. Some 120 years later, an Englishman named William Willett wrote a pamphlet called The Waste of Daylight, which proposed a similar system.

Historians at Harvard University say the Germans adopted the system in 1915. It was done as a fuel-saving tactic during World War I. The British followed with a daylight-saving plan of their own in the following year.

In 1918, Congress had passed the Standard Time Act, which established time zones in the U.S. As part of the Act, daylight-saving time was ruled to begin in March.

Most Americans enjoyed the longer hours of daylight, but there were vigorous complains from some, including dairy farmers whose early milking hours were disrupted. So in 1920 advancing time became an option that states and communities could choose to adopt or not.

During World War II, year-round daylight-saving time was the law in the U.S. Then after the war, the country returned to the March through October system.

In 1966, the start date was shifted to the first Sunday in April, which pleased a lot of people, including dairy farmers.

By 1973, daylight saving was on the move again. The oil crisis forced Congress to extend daylight-saving time, which then lasted from January 6 to October 27,1973, and from February 23 to October 26,1974. In 1987, the starting date was officially set as the first Sunday in April.

Today, daylight-saving time is observed in most U.S. states, but not all. There are still a few holdouts.

#### TIPS FOR AVOIDING DEER

Indiana drivers are more likely to be involved in collisions with deer during the fall months, reports DNR deerresearch biologist Zach Walker

"The work commute and the deer commute tend to coincide during the fall," said Walker. "More cars and more deer are moving at sunrise and sunset."

White-tailed deer travel more during fall due to breeding activities and changes in their food sources. Male deer are actively seeking does, while female deer not ready to breed often run from love-sick bucks. The corn harvest also reduces cover and changes food sources for deer.

Walker says Indiana State Police accident records show more than half of the car accidents involving deer each year occur in the last three months of the year.

For three years running, Marion and Tipton Counties reported the fewest number of deer/motor vehicle accidents per billion miles traveled. Ohio and Pulaski counties had the most. Union, Noble and Starke counties were often in the top part of this list. The last deer/car accident statistics available from the Indiana State Police were from 1999.

The DNR suggests some precautions to help motorists avoid collisions with deer.

\*Slow down around dawn and dusk.

\*Scan the roadside for deer (often their eyes will reflect headlights). If a deer is grazing along the road, the animal could easily dart into traffic.

\*Deer often travel in groups, so seeing one deer may mean that

others are nearby.

\*Look for deer crossing signs. The Indiana Department of Transportation posts the warning signs to alert drivers of frequent deer crossing areas. The signs indicate a general area rather than an exact crossing point.

\*Deer are creatures of habit. They will cross a road in the same general area time after time. If you see deer at a location one day, there is a good chance that they will cross in the same area again.

\*Use high-beam headlights at night in rural areas whenever oncoming vehicles are not present.

\*Try not to swerve to avoid hitting a deer. State police reports indicate that accidents resulting from loss of control of the vehicle generally are more severe than accidents resulting from an impact with an animal.

#### T-SHIRT CONTEST

Attention sixth graders, how would you like to design a T-shirt and have a copy of it made for everyone in your class? With Indiana Farm Bureau's "Get Into Agriculture" T-shirt contest, you have the chance.

Sixth graders from around the state are invited to create their own agriculture inspired T-shirt design. The design is limited to the front of the T-shirt only and the design must fit into the boundaries of an 8 ½ by 11-inch sheet of paper.

"We want all students, but especially sixth graders, to focus on how agriculture benefits all of us. The benefits go beyond the food we eat. There are many products and by-products that come from the farm," said Indiana Farm Bureau 2<sup>nd</sup> Vice President Carolyn Hegel. "Agriculture is a big business. Hopefully this contest will help students see that the farm impacts our every day lives."

In addition to T-shirts for every class member, the winner will be recognized at the Indiana Farm bureau state convention December 14 and 15 in downtown Indianapolis. The deadline for the con-

test is October 15. Any questions should be directed to the County Woman Leader for your county. Her name and phone number can be obtained from the county Farm Bureau office.

Artwork must be related to agriculture and all designs must be done by hand. Artwork may use up to four colors. Different shades of the same color count as only one color. For example, light green and dark green are considered one color.

No trademarks of brand names should be incorporated in the design. If they are used, the entry will be disqualified. The words "Get Into Agriculture" may or may not be incorporated in the design; it is up to the discretion of the student. If wording is used, all spelling must be correct and words must be legible. Unreadable, misspelled words will lead to disqualification.

Students should print their name, address and phone number on the backside of the design. All designs must be original artwork of the student. Indiana Farm Bureau will choose the winners and retain all rights to the design.

#### FREE SCREENINGS

Between 17 and 20 million American develop some form of depression each year. Once again, in observance of National Depression Screening Day, the Caylor-Nickel Counseling & Therapy Center will offer free, anonymous depression screenings. The screenings will be offered on Thursday, October 11, 2001, from 5 p.m. to 7 p.m. in the Caylor-Nickel Counseling & Therapy Center, located on the first floor.

This screening is for anyone who thinks they or someone they care about might suffer from depression. Those in attendance will have the opportunity to hear an educational presentation on depression, complete a written screening test, and talk one-one with a mental health professional. Take-home educational materials on various behavioral health issues will also be available.

People with depression often feel alone, not realizing that depression affects many people. Common symptoms of depression include feelings of sadness, loss of pleasure in usual activities, feelings of hopelessness and worth-lessness, changes in sleep and appetite, loss of energy, restlessness, and thoughts of suicide. Unfortunately, fewer than half of

those suffering from depression actually receive treatment. Depression remains one of the most treatable illnesses, with the vast majority of sufferers showing improvement in as little as eight weeks.

Depression is a clinical disorder; and, just like any other medical disorder, it requires appropriate treatment. Take advantage of this special public service to learn more about the disease and treatment options available. For more information, call the Caylor-Nickel Counseling & Therapy Center at (219) 824-3500 or 1-800-756-2663
